

Fill in the tables below summarizing the information you learned about the location, climate, and natural resources of specific countries in Latin America using the following statements:

Mexico and Venezuela

- Most people live in cities in the central part of the country while others live along the border and areas rich in minerals
- Hot and humid climate with a rainy season
- Location makes it a great trading partner with the U.S.
- Location allows for trade with neighbors such as the U.S., Brazil, and Colombia
- Areas rich with minerals like silver, copper, lead, iron, and oil, but oil is the most valuable resource
- Most people live along the coast in cities
- Mostly dry climate with little rainfall with a humid, tropical climate found in the South
- Oil is the most valuable natural resource and many people work in the oil industry

Country	Location and Its Impact on Trade	Natural Resources and Impact on Trade	Climate	Where People Live and Why?
Mexico				
Venezuela				

Brazil and Cuba

- Rich soil is good for growing sugarcane, coffee beans, and tobacco, but sugar is its main product. Also exports nickel and fish.
- Semi-tropical, with warm, moderate temperatures and mostly flat land
- Location on the Atlantic Ocean allows it to ship products all over the world
- Most live in cities like the capital
- Location would allow lots of trade, but its trade is mainly with China and Venezuela not the U.S.
- Most of the country has a low elevation with a warm, humid climate and a huge rainforest
- Sugarcane, coffee beans, and oranges are grown, but it's a top producer of coffee
- Most live along the Atlantic coast in cities

Country	Location and Its Impact on Trade	Natural Resources and Impact on Trade	Climate	Where People Live and Why?
