

## How Do We Fix It?

We have examined Canada's environmental issues, as well as the economic and government systems in place in Canada. We have discussed the role of the citizen in both the economy and the government. It's time to put all that work together to make a point.

**Choose an environmental issue in Canada. Propose a solution that involves the economy, the government and the citizens. How do we fix the problem?**

- > Acid Rain in the Great Lakes
- > Deforestation
- > Extraction of Fossil Fuels

This is an opinion assignment. There is no right or wrong answer. The key is to compose a detailed, logical solution to the problem and show your understanding of government and economics in Canada.

**You will be given an organizer to plan your essay.**

- The organizer should be completed by Wednesday, January 31st.

**Your final response must include:**

- At least one environmental issue that needs to be solved
- At least one possible solution
- At least one way the government can be involved
- At least one way people can contribute directly
- At least one way the economic system can be used to help

**Your response must be:**

- Typed and turned in digitally (OneDrive or Email)
- At least three paragraphs (3-5 sentences each)
- Completed by Monday, February 5th
