

3D Europe Project Follow-Up – “What if...”

What if there was no English Channel? What if there were no Alps? No Pyrenees? What would Europe look like without those physical features?

Redraw the map of Europe without these features. Imagine the islands of Great Britain as a peninsula and that the Pyrenees and Alps do not exist. How would the borders of Europe change? Which countries would grow? Would some countries disappear?

1. Explain why you drew the borders the way you did. What were your reasons for the changes you made?

2. How would these changes affect culture in Europe?
